

# Let's Draw People

## An After School Art Class

This next series comes at the request of the students. They let me know they would be interested in learning to draw better... specifically learning to draw people.

So here we go. The March and April session will focus on drawing. We will look at the human face and the placement of the features. Another topic will show how we can use the head to determine the proportions of the rest of the body. It's all about drawing people more accurately. Whether they choose to draw realistically or more cartoon like in the future, this series will help them do that. I look forward to seeing what we can do!

This six week series runs every Monday there is school through March and April except for the short week before Easter (so no class April 10<sup>th</sup>)! If you are interested in this class, there is an enclosed form that can be filled out and returned to the school office.

Please feel free to contact me with any questions. [www.artwithmsaudrey.com](http://www.artwithmsaudrey.com)
